

Advanced Protocol™ Callitrichid Diet

5LK6*

DESCRIPTION

Advanced Protocol™ Callitrichid Diet is a palatable diet designed to support a variety of feeding regimes for marmosets and tamarins.

Features and Benefits

- Available as a convenient powder which mixes with hot water to form a palatable soft moist product
- Stabilized vitamin C provides a longer shelf life
- Contains natural vitamin E
- Highly palatable, readily consumed

Product Forms Available

- Powder

GUARANTEED ANALYSIS

Crude protein not less than	20.0%
Crude fat not less than	7.0%
Crude fiber not more than	2.5%

INGREDIENTS

Glucose, ground corn, casein, wheat middlings, gelatin, sucrose, dried egg product, wheat germ, dried whey, corn gluten meal, ground wheat, dehulled soybean meal, calcium carbonate, soybean oil, ground beet pulp, corn oil, citric acid, brewers dried yeast, dehydrated alfalfa meal, animal fat preserved with BHA, wheat bran, dicalcium phosphate, artificial flavor, fish meal, xanthan gum, salt, potassium carbonate, folic acid, l-ascorbyl-2-polyphosphate (source of vitamin C), pyridoxine hydrochloride, magnesium oxide, choline bitartrate, DL-methionine, cholecalciferol (source of vitamin D₃), menadione dimethyl-pyrimidinol bisulfite (source of vitamin K), choline chloride, L-tryptophan, vitamin A acetate, calcium pantothenate, ferrous sulfate, biotin, thiamin mononitrate, riboflavin, dl-alpha tocopheryl acetate (source of vitamin E), nicotinic acid, cyanocobalamin (source of vitamin B₁₂), ethoxyquin (a preservative), zinc oxide, ferrous carbonate, copper sulfate, zinc sulfate, calcium iodate, cobalt carbonate, sodium selenite.

FEEDING DIRECTIONS

Feed intake will vary based on age, body size and reproductive status. A targeted level would be 2.5%-3.0% powder per Kg of animal body weight per day (never feed dry powder without combining with water; see Mixing Directions below). Advanced Protocol™ Callitrichid Diet can be fed in combination with fruit, vegetables, browse or other food items.

Advanced Protocol™ Callitrichid Diet has a 6 month shelf life in the dry powder form when stored in a dry environment. A cool and dry environment is ideal. The mixed product should be stored under refrigeration for no longer than 24 hours. The mixed product can be frozen for an extended period of time.

Mixing Directions

1. Mix, by weight, 60% water to 40% Advanced Protocol™ Callitrichid Diet 5LK6. Mix thoroughly with a spoon, fork or whisk for one minute.
2. Pour into a shallow pan and allow to cool. Refrigerate until firm. This should have the consistency of a firm cheesecake.
3. Cut into pieces appropriately sized for the animals being fed.
4. To obtain a drier, firmer mix, combine at a rate of 50% water to 50% Advanced Protocol™ Callitrichid Diet 5LK6.
