

DESCRIPTION

Highly palatable multiple vitamin tablet formulated to supplement the diet of non-human primates. Made with stable forms of fat-soluble and water-soluble vitamins. Each tablet has a uniform size and precision weight.

Features and Benefits

- Highly palatable to non-human primates
- Variety; contributes to the psychological well-being of non-human primates in laboratories

Product Forms Available

- Oval tablet, 6 mm (1/4") thick x 16 mm (5/8") long x 10 mm (3/8") wide
- Each tablet weighs 0.6 grams

INGREDIENTS

Vitamin A acetate, cholecalciferol, dl-alpha tocopheryl acetate, menadione sodium bisulfite (source of vitamin K), ascorbic acid, thiamin mononitrate, riboflavin, nicotinic acid, pyridoxine hydrochloride, calcium pantothenate, folic acid, biotin, cyanocobalamin, maltodextrin, dried corn syrup, cellulose, fructose, magnesium stearate, tableting aids and natural flavors.

FEEDING DIRECTIONS

Provide as a dietary source of vitamins to those animals deemed in need of such supplemental vitamins. For best results, feed with or immediately after a major meal. Amount to feed varies with the purpose of the supplementation, animal size and condition. Follow the recommendations of a veterinarian who is familiar with the animals being supplemented. For most small non-human primates (less than 20 kg) one tablet daily will supplement their normal diet.

STORAGE CONDITIONS

For best results replace the lids on the containers promptly after removal of tablets to be used. Store in original container in a cool (75° F or colder), dry (approx. 50% RH) location.

CHEMICAL COMPOSITION¹

Each Tablet Contains:

Vitamin K (as menadione), mcg.....	15.1
Thiamin (as thiamin HCL) mg.....	0.84
Riboflavin, mg.....	0.96
Niacin, mg.....	10.8
